

## **REMARKS**

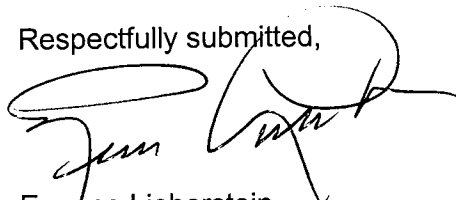

The rejection of claims 1-8 under 35 USC 102(b) as being anticipated by KR 1999-47851(KR '851) is respectfully traversed. In addition, the rejection of claims 1-2 and 5-8 under 35 USC 102(b) as being anticipated by KR 2000-21804 (KR'804) as well as the rejection of claims 1-2 and 5-7 under 35 USC 102(b) as being anticipated by KR 2002-74791 (KR '791) and the rejection of claims 1 and 3-8 under 35 USC 102(b) as being anticipated by Wells et al (USP 6,222,620), are all respectfully traversed.

Claim 1 has been amended to recite a photopolymerizable urethane acrylate oligomer derived from a urethane reaction of a polyol copolymer mixed with a sorbitan fatty acid ester or polyoxyethylene sorbitan fatty acid ester. Accordingly, the photocurable and antistatic resin composition of claim 1 is clearly not anticipated by KR '851, KR '804, KR '791 or by Wells '620 respectively.

Claims 2-8 depend from claim 1 and are therefore believed patentable for the same reasons as given above.

Reconsideration and allowance of claims 1-8 is respectfully solicited.

Respectfully submitted,

Eugene Lieberstein
